

Warrior-T Activities Report

Developing Simple Ways to Train Complicated Things...

Volume I, Number 4 – 23 December 2002

Chief's Comments

We hope you have a very Merry Christmas and a Happy New Year... We look forward to 2003 as the Army continues its transformation in digital command and control systems and we move ever closer to network centric warfare.

◆ Warrior-T, in conjunction with CTD, DCST-W, is currently developing a number of EAC tasks and battle drills that integrate GCCS-A, C2PC, ADOCs and ABCS systems. We would appreciate any expert support or comments as we work to fulfill this important endeavor. **POC: MAJ Collins**

◆ Warrior-T is providing digital ABCS training products to USAEUR as its units begin fielding ABCS systems. Any unit being fielded ABCS systems may contact Warrior-T or view our web-site to obtain training products.

◆ Attached is the first in a series of collaborative listings of ABCS training development products being developed throughout the digital community. **POC: MAJ Williamson**

◆ Warrior-T has been added to the AKO Knowledge Collaboration Center where we will begin posting ABCS Digital Training projects under development. Warrior-T's site is found in AKO's collaboration tab under TRADOC.

◆ Members of Warrior-T will be participating in the 21-23 January 2003 TRADOC Digital Training Conference at Fort Huachuca. As we continue to field ABCS systems and stabilize the versions, the ability to provide pertinent and quality training material for digital systems increases. The Conference will help set the direction for future success.

Techniques and Procedures:

POCs: MAJ Healy or Mr. Manson

Techniques and Procedures (T&P) Manual:

Work continues on development of the Blue Picture Module of the T&P Manual for use by units, staff officers and NCOs during tactical operations and SOP development. The modules are being created following collection of field observations from unit training events and development of ABCS-specific expertise within the Warrior-T staff. The first sub-modules will be the JMTK Task Bar Menu and Tactically Oriented Map Views. **The JMTK Task Bar Menu T&P is scheduled for initial release in mid January.**

Digital Dictionary: Warrior-T is finalizing a digital dictionary that identifies and defines the critical words, phrases, acronyms, and abbreviations used in the ABCS digital environment.

Refer to the Brigade TTP series page at the Warrior-T web site ([Products page](#)) for other related products and a more detailed explanation of the overall Techniques and Procedures methodology and projected publication dates. **POC MAJ Healy.**

Warrior-T Activities Report

Developing Simple Ways to Train Complicated Things...

Volume I, Number 4 – 23 December 2002

Tasks:

POCs: MAJ Collins or Mr. Teal.

ST 20-101-5-ABCS, Digital Brigade Battle Staff

Collective Tasks: Warrior-T is working with the Fort Hood BCTC to update the Digital Brigade Battle Staff (DBBS) Tasks and Special Text. This effort also includes updating our DBBS tasks to reflect the new doctrine proscribed by Armor School's recent publication of FM 3-90.3 and ARTEP 71-3-MTP.

Task Product Update: ST 20-101-5-ABCS-CORE-TASKS, 27 November 2002 has been commandant approved by the Infantry School. Additionally, this edition of the product now contains the FCB2 version 3.5 tasks. The product can be found on the left side of the Warrior-T home page or on the Products/Handbooks web page of the Warrior-T website.

Battle Staff ABCS Common Tasks: Warrior-T is working with DCSOPS&T, TRADOC to help identify the Army's Battle Staff ABCS Common Tasks. These tasks will be used as the basis for training across TRADOC to support the transformation effort.

DTSS Tasks: Warrior-T is working with the Engineer School to ensure it has a copy of the latest proponent produced DTSS tasks in the Warrior-T Task Database. This will make the most up to date DTSS tasks available to units and soldiers through the Warrior-T web-site task map viewer.

Air Defense and AMDWS Tasks: Warrior-T is working with the Air Defense School and local units to review and update the latest air defense digital battle staff and AMDWS tasks.

Warrior-T Support:

POCs: Mr. Parker and Mr. Crandell.

ASAT Database: Warrior-T is cleaning up its ASAT database in anticipation of the ATIA-M migration. More details will be provided when the ATIA-M is approved.

Web-site Task Map: Warrior-T is enhancing its web-site task map viewer's capabilities. Suggestions are welcome.

Techniques and Procedures (T&P) Manual Enhancements: The Support Branch is also developing the HTML templates and a web-based user interface for the T&P series.

Battlefield Operating Systems:

Command & Control: Members of Warrior-T recently returned from Fort Lewis, WA where they observed SBCT digital TOC functions during the 1-32 IN's EXEVAL (4-10 Dec 02). The group was able to collect critical information, SOP items, and TTPs to help Warrior-T develop its new T&P Series. **POC: MAJ Healy.**

Mob/Surv/CM: Warrior-T is working with the 3/2 SBCT Engineer Terrain Team, PD CTIS, TVC at the Engineer School, and the Engineer School DOTD to write the Terrain Team Operations portion of FM 3-23.221, SBCT Engineer Operations.

POC: MAJ Williamson

Warrior-T Activities Report

Developing Simple Ways to Train Complicated Things...

Volume I, Number 4 – 23 December 2002

ABCS Systems:

Signal: Warrior-T's signal contingent is currently attending the 30th Annual Signal Symposium at Fort Gordon, Georgia. **POC: MAJ Collins and Mr. Perrault.**
